SUMMARY

React Native Developer with ~3 years of experience building and scaling cross-platform mobile applications across enterprise and startup environments. Proven ability to own features end-to-end from architecture design to production deployment, serving 100K+ users. Strong focus on performance optimization, reusable component systems, and secure authentication workflows. Experienced in shipping production releases, improving app performance, and collaborating across cross-functional teams.

WORK EXPERIENCE

Tata Consultancy Services | [Link](#)

Bangalore, India

Systems Engineer / React Native Developer

Jun, 2023 – Present

- Led development of scalable React Native features for a cross-platform pension platform, contributing to 100K+ users and improving user satisfaction by 40% after migration from web to mobile.
- Built reusable component systems, reducing reliance on external libraries and accelerating development timelines by 50%.
- Implemented Redux Toolkit and RTK Query for efficient state and API management, improving app responsiveness and overall performance.
- Developed and maintained robust applications by integrating Jest for unit testing (reducing bugs by 35%) and resolving production issues using profiling, logging tools, and crash analysis.
- Delivered 5+ production releases to the App Store and Play Store, leading development for 3 releases and ensuring stability, performance, and platform compliance.
- Mentored and supervised a junior developer through goal-setting, code reviews, and performance evaluations, improving code quality and delivery consistency.

DuYu (SensibleT) | [Link](#)

Remote

Mobile Application Developer

Dec, 2024 – May, 2025

- Owned end-to-end development of a cross-platform React Native application from scratch, including architecture design, feature development, testing, and deployment, while collaborating with clients to enhance UX and reduce app bundle size.
- Designed reusable component architecture, reducing development effort by 50%, and implemented core product features including secure authentication (OTP, persistent login, token storage), chatbot-driven user flows, and responsive UI systems.
- Optimized application performance across multiple releases by improving navigation, rendering, and bundle size, ensuring a smooth, scalable, and production-ready user experience.

ACADEMIC PROJECTS

Cyberbullying Detection & Reporting | [Link](#)

- Led a team of 5 to develop a machine learning-based system for detecting abusive content in social media, achieving 94% accuracy using TF-IDF and supervised learning models.
- Designed and evaluated multiple classification approaches, focusing on building a scalable solution for real-world content moderation use cases.
- Explored integration potential with user-facing platforms, demonstrating how ML systems can enhance safety features in social applications.

AWARDS AND ACHIEVEMENTS

- Won the Top 500 at India's Largest Newton Coding Competition by Newton School.
- Earned a badge of Honors in **Applied Data Science I: Scientific Computing & Python** by WorldQuant University.
- **HackerRank 5-Star Gold Badge in Python** – Awarded for top-tier performance in Python programming and problem-solving.

SKILLS AND INTERESTS

Technical Skills:

Mobile Development: React Native, React Navigation, Android, iOS, Deep Linking, Push Notification through Firebase

State & Data: Redux Toolkit, RTK Query, Context API, REST APIs

Performance & Debugging: Optimization, Profiling, Error Handling, Jest

Tools & Platforms: Xcode, Android Studio, Firebase, Google Analytics, Git

Languages: JavaScript (ES6+), TypeScript, Python

Other Skills: Agile Methodology, Process Planning, Figma, Google Cloud Platform

EDUCATION

SRKR Engineering College, Bhimavaram | Bachelor's degree in Computer Science & Engineering (2019-2023)
